PROFILE

Recent graduate of the Master in Cybersecurity and Cyber Defence at the University of Luxembourg, with a Bachelor's in Computer Engineering. I'm a curious and hands-on person who enjoys solving problems, learning independently and understanding how things work. I value teamwork, clear communication and being someone others can rely on. I adapt quickly to new environments, take initiative when faced with challenges and enjoy explaining things in a simple, practical way. I'm looking for an entry-level opportunity in IT support, systems or cybersecurity where I can keep learning, contribute to the team and grow professionally.

TECHNICAL SKILLS

Systems & Networking	Programming & Data	AI, Security & Regulation
Linux	Python	Adversarial ML (evasion,
Docker	C, C++	poisoning)
Git & GitHub	SQL, PostgreSQL	Jupyter, Google Colab
TCP/IP & networking	JavaScript, HTML, CSS	NIS2, GDPR, DORA, ISO
Wireshark, tcpdump	React	27001
ADB		Figma

SELECTED TECHNICAL PROJECTS

VaultLab – Password Manager & Ubuntu Home Server [blog.nepeu.eu/]

- Building a **password manager** and an **Ubuntu home server**, documenting setup, troubleshooting and debugging in a public daily learning journal.

Open Network Security Lab

- Built a **Linux-based virtual lab** to reproduce and analyse ARP spoofing and man-in-the-middle attacks, using packet analysis, HTTPS/TLS, and **iptables** to investigate traffic and harden the setup.

Database Security Project [github.com/shishirpandey18/Database-Security]

- Designed a **PostgreSQL 16** medical records system with five roles (patient, doctor, pharmacist, admin, system), **RBAC and row-level security**, field encryption with **pgcrypto**, audit logging, and `pg_dump` backups, documented with an ERD and demo videos.

Serious Game for Cyberbullying Awareness

- **2nd Place**, CyberEdu4Teens Hackathon (Google.org & SnT), 2025; **selected for workshops in Luxembourg lycées.** Took a research-based learning tool from requirements and design to a tested prototype, evaluated it with users, and documented the full process.

Adversarial Attack Transferability – AI & Cybersecurity [github.com/shishirpandey18/AI-and-Cybersecurity-Project]

- In a team of two, reproduced a **USENIX Security 2019** study on how **evasion and poisoning attacks** transfer between ML models, implemented in **Python/Jupyter** on MNIST, and extended it to run attacks against **multiple surrogate models at once**.

NIS2 Compliance Audit Report

- Worked from long regulatory and framework documents (**NIS2, ENISA, CIS Controls, NIST CSF**) to assess a fictional organisation and produce a structured report with prioritised recommendations.

WORK EXPERIENCE

Research Assistant – Technical Testing & Documentation *[12/2024 – 03/2025]*

University of Luxembourg, SnT

- Tested Android applications hands-on using ADB commands, a vulnerability scanner (VUSC), and manual checks to find and reproduce issues.
- Recorded findings in a structured, reproducible way and wrote technical reports for the research team.

Event Team Member – Summer Job *[08/2025 – 10/2025]*

LUGA Luxembourg Urban Garden

- Worked in a diverse team during a busy public event, coordinating with colleagues under time pressure and solving problems on the spot.

EDUCATION

Master in Cybersecurity and Cyber Defence *[09/2024 – 09/2026]*

University of Luxembourg

- **Master's Thesis:** Designed, built, and evaluated a game-based learning tool that helps teenagers recognise and respond to cyberbullying, from concept to a working, tested solution with clear documentation. Successfully defended [28/08/2026]. *Report available upon request.*
- **Relevant coursework:** Generative AI and Cybersecurity: Architectures, Threats, and Defenses; AI and Cybersecurity; Open Network Security; Database Security; Cybersecurity Risk Management; Threat Intelligence & Digital Forensics.
- **CyberEdu4Teens Scholarship (Google.org Seminars):** Awarded for my research proposal on gamified interventions to raise cyberbullying awareness among teenagers [03/2026].
- **International selection:** Chosen from 67 applicants for Winter School 2025 at the University of Rome Tor Vergata, Italy [12/2025], fully funded.
- **EUMaster4HPC Summer School:** "HPC and Emerging Trends", University of Luxembourg [07/2026].

Bachelor in Computer Engineering *[2018 – 2023]*

Tribhuvan University, Nepal

- Foundations in software engineering, operating systems, computer networks, databases, and programming.

COLLABORATION & COMMUNICATION

- Delivered a technical awareness session for Luxembourg Tech School students, explaining technical concepts clearly to a young audience.
- Student Representative for Master's cohort, University of Luxembourg [09/2025 – 09/2026], acting as the link between students and staff.
- Vice-President, NCE IT Club [12/2021 – 02/2023]; Treasurer, NCE IT Club [12/2019 – 12/2020].

LANGUAGES

Nepali: Native | **English:** C1 (IELTS 7) | **French:** Intermediate | **Hindi:** Intermediate
