About Me

Computer Engineering graduate currently pursuing a Master's degree in Cybersecurity and Cyber Defence, with a strong focus on data protection, privacy, Analysis, cybersecurity policy, and ethical implications of digital technologies. Experienced in security analysis and data-driven research, with academic training in EU digital sovereignty, cyber risk management, and privacy-aware system design.

EDUCATION AND TRAINING

Master in Cybersecurity and Cyber Defence — *University of Luxembourg* [16/09/2024 – Expected Graduation: 08/2026]

- Master's Thesis (ongoing): "*Design, Implementation, and Empirical evaluation of a Gamified behavioral intervention framework for Cyberbullying risk prevention among Adolescents*"

Winter School 2025 - "Space Through Literature, Theatre, Cinema, and Other Arts" — *University of Rome Tor Vergata [Dec 2025]*

Bachelor in Computer Engineering — *Tirbhuvan University, Nepal* [2018 – 2023]

WORK EXPERIENCE

Research Assitant (Collect, Analyse, Store Data) — **University of Luxembourg, SnT** [15/12/2024 – 15/03/2025]

- Performed Android app analysis using VUSC (Vulnerability Scanner), executing ADB commands, manually interacting with applications, and documenting findings through detailed reports.

SKILLS

Technical Skills	Web & Development	Data Protection & Governance
Python, C, C++, Linux, TCP/IP, Networking Fundamentals, MS Office applications (Excel, Word, Powerpoint),	HTML, CSS, JavaScript	Cyber Risk Management, Privacy-aware system design (academic exposure)
Packet Analysis (Wireshark, tcpdump), Vulnerability Scanning, Android App Analysis	React (Hooks, Router, DOM)	Ethical and legal considerations in cybersecurity, Security & policy alignment

AWARDS & HONOURS

CyberEdu4Teens (Google.org Seminars) Scholarship - March 2026

Awarded for my research proposal on gamified educational interventions for cyberbullying awareness among teenagers.

2nd Place – CyberEdu4Teens Hackathon (Google.org & SnT), 2025

- Designed and developed an interactive physical attack-and-defence cybersecurity card game to teach core security concepts to teenagers aged 12–17.
- Project selected as 2nd place winner and prepared for deployment in Phase 2 as part of nationwide cybersecurity workshops in Luxembourg lycées (2026).
- Project recognized for creativity, educational impact, and potential integration into national outreach workshops.

Relevant Coursework

- **Cybersecurity Ethics – ethical decision-making, privacy, societal impact of digital technologies**
- **Cyber Policy – national and EU-level cybersecurity and data governance frameworks like GDPR, NIS2, DORA**
- **Cybersecurity Risk Management – risk assessment, mitigation strategies, compliance-oriented security, ISO 27001**
- **EU Digital Sovereignty – EU data strategy, digital sovereignty, secure data sharing through research & innovation**
- **Entrepreneurship (Cybersecurity context) – innovation in regulated and public-sector environments**
- **Threat Intelligence & Digital Forensics – legal and ethical considerations in cyber investigations**

CERTIFICATION & TRAINING

Information Security Fundamentals [21/09/2025] Certificate: https://coursera.org/share/697e9bebd30b2fb6c952cb2a4bfc81d9

- Gained foundational knowledge of information security principles, threats, vulnerabilities, and security controls, while developing skills in threat detection, the security life cycle, human factors, and cybersecurity best practices.

Cybersecurity for Everyone [15/09/2025] Certificate: https://coursera.org/share/ef877434b104ccba4ece255a08c7477a

- Acquired knowledge of cybersecurity principles, governance, risk and security management, data security, and networking, while developing skills in threat detection, vulnerability analysis, and cyber-attack management to support organizational resilience.

Full Stack Development Using MERN [07/2023 – 09/2023]

Professional Diploma in Computer Application [2014 – 2015]

PROJECTS

Music Recommendation System Based on Emotion Recognition using CNN

- Developed intuitive frontend interface for the music player
- Technologies Used: HTML, CSS, JS, React

Nepal Expedition

- Developed a system for tourist to view and book different packages
- Created form using formik with Yup validation for Authentication.
- Technologies Used: HTML, CSS, JS, React, Formik, Yup

LANGUAGE SKILLS

Mother tongue(s): Nepali | Other language(s): English (IELTS: 7 (C1)) Hindi (Intermediate) French (Basic)

SOFT SKILLS

- Provided session in “Cyberbullying in the Digital Age: Awareness, Impact & Responsibility” for Luxembourg Tech School (LTS) student’s, demonstrating ability to explain complex topics clearly
- Strong communication skills with ability to explain technical concepts clearly
- Detail-oriented with focus on data accuracy and quality
- Collaborative team player with experience working across disciplines
- Highly organized with effective documentation and time management skills
- Curious and proactive learner with strong problem-solving mindset

VOLUNTEERING

Student Representative for my cohort - University of Luxembourg	[09/2025 - 09/2026] Luxembourg
Volunteer at CAN Info-Tech 2023	[02/2023] Nepal
Vice-President of NCE IT Club	[12/2021 – 02/2023] Nepal
Organizer of Yatra 4.0 Recognize as Finance Manager	01/2023] Nepal
Treasurer of NCE IT Club	[12/2019 – 12/2020] Nepal
Organizers of Yatra 3.0 Recognize as Graphic Designer	[07/2019] Nepal
Vice-Secretary of NCE IT Club	[12/2018 – 12/2019] Nepal
